Projects

1. Roavia (Travel Management Platform)

[Live](#)

A full-stack, role-based travel management platform for users, tour guides, tour managers, and administrators. Users can discover and join trips, while tour guides can register and join tours as guides. The system provides secure authentication, role-based access control, and centralized trip management.

Features:

- Choosing Tours, Guides, packages as you wanted.
- Join Us Tour Guides.
- Managing all operations from the Admin Dashboard.

2. Grapetask (Freelancing Task Hunting Portal)

[Live](#)

A full-stack freelancing task hunting platform connecting clients and freelancers through category-based job postings.

Clients can post tasks and select categories, while freelancers discover relevant jobs and bid on projects matching their skills.

The platform features secure Firebase authentication and centralized task and bid management.

Features:

- Firebase Authentication
- Freelancer Bidding System
- Category-Based Tasks Finding

3. Educamp (Educational Task Finding Platform)

[Live](#)

An educational task finding platform that connects teachers and students through topic and category-based assignments.

Teachers can create and publish assignments, while students submit their work as documents. The system allows teachers to evaluate submissions by providing grades, ratings, and detailed feedback, enabling effective academic assessment and progress tracking.

Features:

- Assignment Creation by Teachers
- Topic & Category-Based Tasks
- Document-Based Student Submissions
- Marks & Grading System
- Ratings and Feedback Management
